

As school began to start things were getting better, but lots of changes occurred due to the pandemic. This entry is about what I would do when the COVID-19 pandemic finally comes to an end. When I first wrote this entry, school had just started and we needed to wear masks at all times when in class.

August 31, 2020: *When it's Over*

When masking and social distancing are over, I will hang out with my friends a lot more. When corona first started in March, my parents would not let me hang out with my friends that much. However, as quarantine got longer and longer my parents let me hang out with friends more and more. Another thing that I want to do is play sports. I want to play football and basketball with my friends without masks and social distancing. I haven't been able to do this in months. When you play tackle football you can't socially distance and it's a contact sport. Another thing I want to do is go to the movie theater. Movie theaters have been closed for a while making it hard to see new movies. I watch movies at home but it's not the same as going to the movie theater to watch a movie. Another thing is to go to school normally, school is a lot different because I haven't seen a lot of my friends because of how to split up classes are. During classes, I can't talk to them because they have masks on and they are 6 feet away. Therefore, making it much harder for me to interact with them during the school day. The last thing I want to do when masking and social distancing is gone is to go to a football or basketball game. It would be really fun to watch a game with fans because there haven't been fans for months.
