

Safety Precautions during a Pandemic

My experience with COVID-19 is going out into the streets and still seeing some individuals not wearing masks. When looking at this, I still wonder to myself why people don't wear masks when there is evidence that masks help prevent the spread of infection. Therefore, this tells me that in relation to masks and the pandemic, either some individuals don't believe that the pandemic is real/deadly or don't believe in wearing masks outside.
