

Letters to the editor:

Reader has had enough

Boscobel

Editor-

Enough is enough! The latest and most egregious effort at voter suppression was the determination of some of our elected officials to go ahead with the Spring Election, despite Governor Evers' sensible efforts to postpone it. This outrage is added to the years of gerrymandering, tinkering with laws regarding voter registration, voter ID and absentee voting, all with the goal of supposedly preventing voter fraud.

The insistence by these elected officials that the Spring Election be held as scheduled despite a fast-moving viral pandemic at its height of infection was beyond reckless. How could a possible political gain for these officials and their political party balance the decision to ask clerks, poll workers and voters to endanger their lives unnecessarily?

The August Primary Election and the November General Election will give citizens an opportunity to exercise their civic duty and vote these irresponsible officials out of office. We need to let them know that finally, ENOUGH IS ENOUGH.
